education

- **University of British Columbia** - BSc. Major in Computer Science + Co-op Program Sept 2019 - May 2025 (Expected)
 - > Relevant Coursework: Software Engineering, Hardware and Operating Systems, Databases, Networking, Intro to AI, Machine Learning and Data Mining, Applied Machine Learning, Advanced Algorithm Design and Analysis, Distributed Systems

experience

- **Amazon** - Software Development Engineer Intern (AWS IAM, Identity Center) - Vancouver, B.C. June 2024 - Aug 2024
 - > Designed, implemented, and deployed a new feature beta using Java, TypeScript, DynamoDB, Lambda, EventBridge, and CloudWatch
 - > Wrote a design doc detailing design decisions and a scalable low-level implementation from ambiguous feature requirements
 - > Warned team against and helped fix a project-unrelated SEV2 prod issue caused by AWS CDK pipeline infrastructure code changes
 - > Successfully delivered all internship deliverables despite having 2 weeks less time than planned due to team circumstances
- **SAP** - Software Engineer Intern (SAP Analytics Cloud, Workspaces) - Vancouver, B.C. Aug 2022 - April 2023
 - > Developed a full stack proof-of-concept for adding all users to a SAC Workspace using JavaScript, SAPUI5, and XSJS
 - > Delivered various front-end and back-end bug fixes, reducing 20+ item backlog by 40%
 - > Led rehaul of UI automation framework, saving 50+ hours of manual regression testing per sprint
- **SAP** - Software Engineer Intern (SAP Analytics Cloud, File Repository) - Vancouver, B.C. May 2022 - July 2022
 - > Collaborated with internal teams to setup and develop API automation for HANA Cloud tenants using Java
 - > Wrote and refactored Jasmine.js unit tests for file repository features with async/await architecture
 - > Took initiative to create internal dashboard to track automation status using Jenkins and S3

projects

- **Spotify Profile** Sept 2023 - Dec 2023
 - > Developed a full-stack web application serving the Spotify API with React as the frontend
 - > Implemented Spotify OAuth to get data from user's libraries and persisted login state using Web Storage API
 - > Used Express and Axios for web server and API calls
- **Insight UBC** Sept 2023 - Dec 2023
 - > Developed a full-stack web application for students to manage and run queries against UBC datasets
 - > Built web server, dataset processor API and query engine API w/ TypeScript and Express
 - > Implemented zipped HTML and JSON dataset parsing and geo-location fetching for rooms
 - > Used React and Vite to create UI for querying and visualizing results
- **Co-op Job Board** Jan 2022 - Apr 2022
 - > Developed a co-op job board web application using PHP
 - > Implemented user/posting creation and management using MySQL with a department provided Oracle

leadership

- **UBC Esports Association** - VALORANT Team Captain (UBC Div 2/Blue) Aug 2020 - May 2023
 - > Led team of 5 players to qualifying for Red Bull Campus Clutch Canadian Finals 2021
 - > Organized and led team practice and tryouts, and managed tournament and match scheduling

technical skills

- **Languages**
 - > TypeScript, JavaScript, Java, Python, C/C++, SQL, PHP, Racket, HTML/CSS
- **Frameworks + Libraries**
 - > AWS SDK + CDK, React, Express, Axios, Mocha, Jasmine, Chai, Guice, JUnit, AssertJ, scikit-learn, pandas, NumPy, matplotlib
- **Tools**
 - > Node, Docker, Jenkins, Git, GitHub, Gerrit, NPM, Yarn, Maven, Webpack, Appvance.ai, JupyterLab
